Education

Canara Engineering College, Mangalore 2023 – Present
Bachelor of Engineering in Computer Science and Engineering *CGPA: 9.0*

Government PU College, Karwar 2020 – 2022
Pre-University (PCMB) *Percentage: 88%*

Technical Skills

- **Languages:** Python, C, Java, JavaScript
- **Web Development:** React.js, React Native, Node.js, Express.js, HTML5, CSS3
- **Databases:** MySQL, MongoDB
- **Tools & Technologies:** Git, GitHub, VS Code, AWS, Docker, Jenkins, Ansible, GitHub Actions, CI/CD

Projects

Waste Collection Management System for Hasiru Dala NGO *React Native, Node.js, Express.js, MongoDB*
Mini Project *2025*

- Developed a waste collection management application to streamline door-to-door waste collection.
- Enabled collectors to manage household collections and monitor daily collection status.
- Integrated a secure digital payment system for waste collection fees.
- Reduced manual record-keeping through a centralized management platform.

Blockchain-Based Digital Locker System *React.js, Node.js, Ethereum, IPFS*
Hackathon Project – 1st Place *2025*

- Developed a secure decentralized document storage and verification system using blockchain technology.
- Implemented smart contracts for tamper-proof document validation and secure document sharing.
- Designed a transparent architecture for secure document verification.

Cross-District Knowledge Transfer for Landslide Risk Prediction *GIS, Python, Machine Learning*
Major Project *2026 – Present*

- Building a cross-district knowledge transfer framework to predict landslide susceptibility for Hassan district, which currently lacks a comprehensive susceptibility map.
- Prepared 16 Landslide Conditioning Factor maps including DEM, slope, aspect, curvature, TWI, rainfall, lithology, NDVI, and more using GIS, and built an integrated machine learning dataset from extracted values.
- Applying transfer learning on landslide data from six neighboring districts, comparing Hassan-only, pooled multi-district, and transfer learning models to improve prediction accuracy.

Experience

Web Development Intern *Sep 2025 – Oct 2025*
InLighnX Global Pvt. Ltd.

- Completed a one-month internship in Web Development.
- Developed responsive web applications using modern web technologies.
- Worked with frontend, backend, Git, and collaborative software development practices.

Achievements

- Won 1st place at Nexathon 2025, organized by Sri Devi Institute of Technology.
- Participated in an ideathon organized by the AI/ML Department, Canara Engineering College (2025).
- Volunteered at ICWIE 2025, the 3rd IEEE conference organized by IEEE Women in Engineering Affinity Group, Bangalore Section (Sep 2025).
- Volunteered for Action Replay and Circuitrix at college fest Aakriti 2025, and for Coastal Startup Fest 2026.

Certifications

- C Programming – Spoken Tutorial Project, IIT Bombay
- Python 3.4.3 – Spoken Tutorial Project, IIT Bombay
